

Sunita Patolia

Country of Origin: India

Degree: PhD, Cell and Molecular Biology

Graduation Date: May 2014

Employer: Florida Hospital Innovation Lab

Position: Project Liason

What do you do in your current position?

I manage collaboration projects between healthcare tech/medical device companies and the Florida Hospital.

How did you find your position?

Networking in all healthcare related meet-ups. I met my current team at an Innovation in Healthcare meet-up in Orlando.

Which career services did you find helpful at UW-Madison?

Resume editing.

Other than your degree, what skills or experience made you competitive in the US job market?

Diversification of skills. I audited business classes during my PhD.

What advice do you have for current international students?

Let your passion for your interest show when you talk to people. Talk to a lot of people. Never actually ask for a job. Always ask for advice and connections. There is no use in just applying online. You have to know people. Take networking classes if you need to and widen your circle of people! Be confident!

“Take networking classes if you need to and widen your circle of people!”
